

Senior Living HIPAA Compliance. Simplified.

**Integrated Health Systems**<sup>™</sup>

Senior Living IT Solutions. Simplified.

## A Comprehensive HIPAA/HITECH Compliancy Solution for Senior Living

Many healthcare organizations struggle to stay compliant in the ever-changing regulatory landscape. To help, Integrated Health Systems has developed **CodeRed™**, a comprehensive solution aimed at helping Senior Living facilities identify and reduce risk, and simplify the complexities of regulatory compliance.

With **CodeRed™**, you'll get the tools you need to identify potential vulnerabilities and introduce administrative, physical, and technical safeguards. **CodeRed™** has separate and distinct options designed to allow you to tailor the solution to your organization's needs.

### Security Risk Assessment (SRA)

All SRAs are conducted by certified HIPAA professionals and **customized for your organization**

#### Discovery (Pre-SRA)

Gather and submit all existing policies and procedures for review by our experts prior to the on-site SRA

#### On-site Expert Assessment

Identify potential vulnerabilities, including a detailed risk assessment of administrative, technical, and physical safeguards

### Security Awareness & Training

All training materials are authored by certified HIPAA professionals and are **customized for your organization**

#### Instructor-Led Training

Instructor-led courses are designed to maximize learning and engagement, leading to greater understanding and compliancy

#### Online Training

Webinar-based training for staff and Compliance Officer, including knowledge checks and certificates

### HIPAA Compliancy Checklist

Annual Security Risk Assessments (SRA)

HIPAA Staff Training

On-site HIPAA Compliance Officer

**ALL of the above must be present to be HIPAA Compliant**

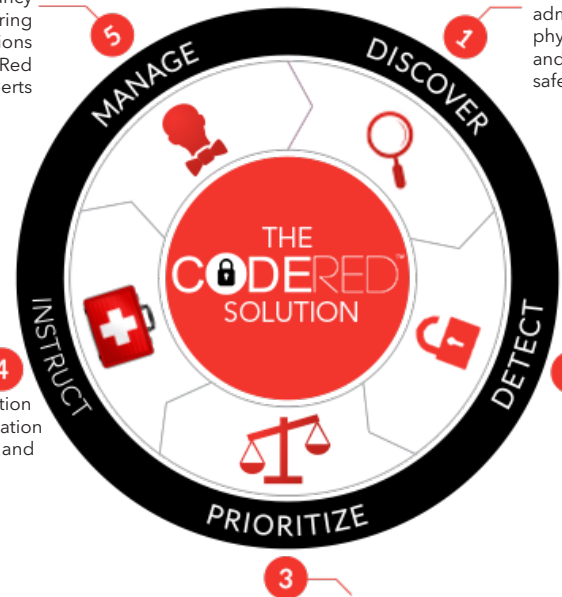

Manage compliancy with recurring consultations with CodeRed experts

Instruction on violation prevention, remediation recommendations, and awareness training

Discover current administrative, physical, and technical safeguards

Detect potential vulnerabilities

Prioritize findings with calculated liability exposure
